IDENTIFIERS	Public Colleges

ABSTRACT

Data on 1982 college and university enrollments and trends for the past few years are presented. Information is provided on enrollment in institutions of higher education by control and level of institution, student sex, and attendance status of student, major field of study, and race/ethnicity. Specific data include: enrollment of first-time freshmen in colleges, by control and institutional level; undergraduate, graduate, and first-professional enrollments by race/ethnicity; enrollments for the aggregate United States; level of enrollment, attendance status, and student sex for the 100 institutions with the largest enrollment in 1982; public and private college enrollments; and full-time equivalent and part-time enrollments. Highlights include the following: after several years of growth, all colleges and universities began to level off in 1982; public institutions reported enrollment gains in all types of institutions except doctoral and comprehensive; among private institutions, a 2.5 percent drop in doctoral enrollment occurred. Appendices include information on the survey methodology, a questionnaire and instructions, and the National Center for Education Statistics Classification of Institutions. (SW)

Washington, D.C. 20402

Foreword

This edition of *Fall Enrollment in Colleges and Universities* presents data collected by the National Center for Education Statistics (NCES) through its 1982 survey of our Nation's colleges and universities. The publication is supplemented by selected tables from the 1981 data collection effort.

We wish to thank the numerous college and university officials who report these essential statistics annually, as well as the various coordinators in the States for their efforts to provide assistance wherever possible. Without their cooperative efforts, these statistics would not be possible.

Richard E. Carlson
Assistant Administrator
Division of Postsecondary and
Vocational Education Statistics

For More Information

Additional information about this report is available from Susan G. Broyles, National Center for Education Statistics, 400 Maryland Ave. SW., (Brown Bldg., Room 600), Washington, D.C. 20202, telephone (202) 254-6503.

Inquiries pertaining to the racial/ethnic data collection and related computer by-products should be directed to the Office for Civil Rights, 400 Maryland Ave. SW., (5622 Switzer Bldg.), Washington, D.C. 20202, telephone (202) 245-1738.

b. Women enrolled part-time 147

Highlights

- After several years of growth, enrollment in all colleges and universities began to level off in 1982. The total number of students enrolled in the 50 States and the District of Columbia reached nearly 12,426,000, up 0.4 percent between 1981 and 1982, after a 2.3-percent gain the previous year.
- Two-year institutions, which accounted for the majority of the overall enrollment growth in 1981 and 1982, reported an increase of 4.3 percent over 1980, bringing their totals to almost 4.7 million students, or nearly a 38-percent share of the total student population.
- Specialized schools (ie., those with a programmatic emphasis in one area of study) reported enrollment gains of 3 percent in both 1981 and 1982. However, these schools represent a relatively small segment of the universe of institutions of higher education. Enrollment levels at all other types of institutions—doctoral-level, comprehensive, and general baccalaureate—remained relatively stable during this period.
- Women continued to enroll at a faster rate than men in 1981, following a trend that began in the mid-seventies. However, for 1982, the enrollment of women leveled off. Women represented a 51.5-percent share of the total enrollment at colleges and universities in 1982, up from 45 percent in 1975. The number of men studying in institutions of higher education increased for the fourth consecutive year, following declines between 1975 and 1978.
- Among private institutions, the most noticeable changes for 1982 were the 2.5-percent drop in enrollment at doctoral-level institutions, down 17,000 students, and the 1.7-percent decline at general baccalaureate schools, a loss of about 14,000 students. These declines were offset by modest gains in 2-year and specialized institutions, as well as substantial increases in schools new to the universe.
- Public institutions reported enrollment gains in all types of institutions except doctoral and comprehensive, with the largest increases affecting those classified as 2-year—up 31,000 students, or 0.7 percent over 1981 levels.
- The number of freshmen entering college for the first time in fall 1982 dropped 3.5 percent after leveling off in 1981 with only a 0.3-percent gain. These changes followed an increase of 3.4 percent the previous year. Public institutions reported decreases of close to 4 percent, while private institutions reported only a slight drop in the number of first-time freshmen in 1982.

Introduction

Data presented in this report are derived from both the 1982 Fall Enrollment and Compliance Report of Institutions of Higher Education and the 1981 survey of Fall Enrollment in Institutions of Higher Education, conducted by the National Center for Education Statistics (NCES). These surveys were conducted as part of the Higher Education General Information Survey (HEGIS) program. The total universe in 1982 consisted of 3,327 institutions. Actual responses were received from 3,255 colleges, or 97.8 percent of the total universe. In addition, data were imputed for 62 schools, and 10 institutions (all newly-added to the universe) could not be imputed since there was no basis on which to make estimates. Data imputed for nonresponse accounted for only 1.5 percent of the total enrollment reported in 1982. The tables in this report are limited in coverage to the 3,282* institutions located in the 50 States and the District of Columbia; only the State tables include data for the additional 45 institutional units surveyed in outlying areas (Guam, Puerto Rico, etc.).

The new classification of institutions adopted by NCES during the 1981-82 academic year is reflected in the tables presented with this report. Institutions are identified as doctoral-level, comprehensive, general baccalaureate, specialized, 2-year, or new (to the HEGIS universe). New schools remain in this category until they have filed 2 years of earned degree data and their actual classification category can be determined based on the actual number of degrees and the number of programs in which they were awarded. Detailed tables are formatted using both new and old HEGIS classifications for comparison purposes; both sets of tables present trend data back to 1979.

It should be noted that detailed institutional data gathered as part of the surveys are not being published in this report. Only summary tables are included; they provide institutional information by level of enrollment, sex and attendance status of students, and they rank institutions with the largest enrollment in 1982 for both the public and private sectors.

Special care should be exercised when using the tables that follow. The percent changes associated with the category "new" are deceiving in that they reflect the addition of schools that are new to the universe and not actual enrollment increases. That is, the base on which the enrollment growth is being calculated is continually changing. Appendix table A-1 indicates the number of institutions in this category between 1979 and 1982.

*Ten of these schools are shown as having "zero" enrollment because they were not imputed.

Washington, D.C. 20402

Foreword

This edition of *Fall Enrollment in Colleges and Universities* presents data collected by the National Center for Education Statistics (NCES) through its 1982 survey of our Nation's colleges and universities. The publication is supplemented by selected tables from the 1981 data collection effort.

We wish to thank the numerous college and university officials who report these essential statistics annually, as well as the various coordinators in the States for their efforts to provide assistance wherever possible. Without their cooperative efforts, these statistics would not be possible.

Richard E. Carlson
Assistant Administrator
Division of Postsecondary and
Vocational Education Statistics

Highlights

- After several years of growth, enrollment in all colleges and universities began to level off in 1982. The total number of students enrolled in the 50 States and the District of Columbia reached nearly 12,426,000, up 0.4 percent between 1981 and 1982, after a 2.3-percent gain the previous year.
- Two-year institutions, which accounted for the majority of the overall enrollment growth in 1981 and 1982, reported an increase of 4.3 percent over 1980, bringing their totals to almost 4.7 million students, or nearly a 38-percent share of the total student population.
- Specialized schools (ie., those with a programmatic emphasis in one area of study) reported enrollment gains of 3 percent in both 1981 and 1982. However, these schools represent a relatively small segment of the universe of institutions of higher education. Enrollment levels at all other types of institutions—doctoral-level, comprehensive, and general baccalaureate—remained relatively stable during this period.
- Women continued to enroll at a faster rate than men in 1981, following a trend that began in the mid-seventies. However, for 1982, the enrollment of women leveled off. Women represented a 51.5-percent share of the total enrollment at colleges and universities in 1982, up from 45 percent in 1975. The number of men studying in institutions of higher education increased for the fourth consecutive year, following declines between 1975 and 1978.
- Among private institutions, the most noticeable changes for 1982 were the 2.5-percent drop in enrollment at doctoral-level institutions, down 17,000 students, and the 1.7-percent decline at general baccalaureate schools, a loss of about 14,000 students. These declines were offset by modest gains in 2-year and specialized institutions, as well as substantial increases in schools new to the universe.
- Public institutions reported enrollment gains in all types of institutions except doctoral and comprehensive, with the largest increases affecting those classified as 2-year—up 31,000 students, or 0.7 percent over 1981 levels.
- The number of freshmen entering college for the first time in fall 1982 dropped 3.5 percent after leveling off in 1981 with only a 0.3-percent gain. These changes followed an increase of 3.4 percent the previous year. Public institutions reported decreases of close to 4 percent, while private institutions reported only a slight drop in the number of first-time freshmen in 1982.

Introduction

Data presented in this report are derived from both the 1982 Fall Enrollment and Compliance Report of Institutions of Higher Education and the 1981 survey of Fall Enrollment in Institutions of Higher Education, conducted by the National Center for Education Statistics (NCES). These surveys were conducted as part of the Higher Education General Information Survey (HEGIS) program. The total universe in 1982 consisted of 3,327 institutions. Actual responses were received from 3,255 colleges, or 97.8 percent of the total universe. In addition, data were imputed for 62 schools, and 10 institutions (all newly-added to the universe) could not be imputed since there was no basis on which to make estimates. Data imputed for nonresponse accounted for only 1.5 percent of the total enrollment reported in 1982. The tables in this report are limited in coverage to the 3,282* institutions located in the 50 States and the District of Columbia; only the State tables include data for the additional 45 institutional units surveyed in outlying areas (Guam, Puerto Rico, etc.).

The new classification of institutions adopted by NCES during the 1981-82 academic year is reflected in the tables presented with this report. Institutions are identified as doctoral-level, comprehensive, general baccalaureate, specialized, 2-year, or new (to the HEGIS universe). New schools remain in this category until they have filed 2 years of earned degree data and their actual classification category can be determined based on the actual number of degrees and the number of programs in which they were awarded. Detailed tables are formatted using both new and old HEGIS classifications for comparison purposes; both sets of tables present trend data back to 1979.

It should be noted that detailed institutional data gathered as part of the surveys are not being published in this report. Only summary tables are included; they provide institutional information by level of enrollment, sex and attendance status of students, and they rank institutions with the largest enrollment in 1982 for both the public and private sectors.

Special care should be exercised when using the tables that follow. The percent changes associated with the category "new" are deceiving in that they reflect the addition of schools that are new to the universe and not actual enrollment increases. That is, the base on which the enrollment growth is being calculated is continually changing. Appendix table A-1 indicates the number of institutions in this category between 1979 and 1982.

*Ten of these schools are shown as having "zero" enrollment because they were not imputed.

Appendix A

Methodology

Survey Background

This publication contains the results of the 1982 survey entitled Fall Enrollment and Compliance Report of Institutions of Higher Education, conducted as part of the 17th annual Higher Education General Information Survey (HEGIS) program. All institutions recognized as accredited and listed in the *Education Directory, Colleges and Universities, 1981-82* and its 1982-83 supplement provided information for the survey or were imputed based on a previous year's response. Data presented in the detailed tables are for all institutions located in the 50 States and the District of Columbia, except for the State tables, which include statistics for schools in the outlying areas. Tables 1 through 24 were designed to present data using the new classification of institutions; schools were designated as either doctoral-level, comprehensive, general baccalaureate, specialized, 2-year, or new to the universe. Appendix tables A-2 through A-23 are directly comparable to tables in the first section, but the old classification of institutions (university, other 4-year, and 2-year) was used in order to conform to those published last year. Since there was no formal publication for 1981, selected tables are included herein to present statistics gathered as part of that data collection effort.

The Universe

The universe for the 1982 enrollment survey consisted of the 3,282 institutions of higher education and their branches in the 50 States and D.C., as well as an additional 45 institutions in the outlying areas. Table A-1 indicates the total number of institutional units in the 1982 universe; fall 1981 totals are included for comparison.

Data have been compiled annually as part of the HEGIS program since 1966, and the origins of the fall enrollment survey extend back to the early 1900's. The survey instrument used currently has not changed appreciably since 1976, thus preserving the consistency of reporting needed for statistical analyses. The 1982 enrollment survey requested data by attendance status (full- or part-time), enrollment level (undergraduate, first-professional, graduate, or unclassified), and sex and racial/ethnic designation of student. The institutional reporting of data also allows for compilation by State, control (public, private), type of institution, and various other characteristics of the institutions themselves that would lend to analysis.

Questionnaire Editing

The survey forms, 2300-2.3A for 4-year institutions and 2300-2.3B for 2-year institutions, were mailed to State coordinators for distribution or directly to institutions in non-coordinated States for completion of data. The survey carried a due date of November 15, 1982. Follow-up was completed by May [illegible], and a clean data base was declared on July 19, 1983. The schedule for the processing of the 1982 data was somewhat slower than usual due to the processing and editing of the racial/ethnic data.

Each response to the 1982 survey was edited for internal consistency (add checks) and consistency with the previous year's response (tolerance checks). Error resolution was performed and institutions were contacted for clarification of problems that could not be resolved by the data editors. These procedures eliminated the larger reporting errors; however, some variances still exist that reflect changes in definitions, reporting practices, and/or institutional policies.

Response Rate

Responses to the 1982 survey yielded an institutional response rate of 97.8 percent. For 62 institutions that did not respond, data were imputed based on their 1981 responses. The 10 institutions that were not part of the 1981 universe could not be imputed.

For institutions that responded to the survey, partial imputation was made for item nonresponse. Again, the 1981 survey response was used where possible; FTE data were imputed or generated at .33 of the part-time total.

Appendix B

NCES Classification of Institutions of Higher Education

General

The following categories A through D cover institutions that grant more than 25 percent of their degrees at the baccalaureate level or above. Institutions in category E grant 75 percent or more of their awards below the baccalaureate level. Category F is for new institutions.

A. Doctoral-level Institutions

These are institutions characterized by a significant level and breadth of activity in and commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings. Included in this category are institutions that are not considered specialized schools (see category D below) and that grant a minimum of 30 doctoral-level degrees. These degrees must be granted in three or more doctoral-level program areas* or, alternatively, have an interdisciplinary program at the doctoral level. Included in the counts of doctoral degrees for classification purposes are the following first-professional degrees: M.D., D.D.S., D.O., and D.V.M. All of these are in a single program area, health professions. One other type of institution is also classified as doctoral: any institution that meets all other criteria for being so classified, except for the number of doctorates, and grants *only* doctorates, is classified as doctoral-level.

B. Comprehensive Institutions

These institutions are characterized by diverse post baccalaureate programs (including first-professional), but do not engage in significant doctoral-level education. Specifically, this category includes institutions not considered specialized in which the number of doctoral-level degrees granted is less than 30 or in which fewer than 3 doctoral-level programs are offered. In addition, these institutions must grant a minimum of 30 post baccalaureate degrees (master's, doctor's, and first-professional) and either grant degrees in 3 or more post baccalaureate programs or, alternatively, have an interdisciplinary program at the post baccalaureate level.

C. General Baccalaureate Institutions

These institutions are characterized by their primary emphasis on general undergraduate, baccalaureate-level education. They are not significantly engaged in post baccalaureate education. Included are institutions not considered as specialized and those in which the number of post baccalaureate degrees granted is less than 30 or in which fewer than 3 post baccalaureate level programs are offered and which either (a) grant baccalaureate degrees in 3 or more program areas, or (b) offer a baccalaureate program in interdisciplinary studies.

D. Specialized Institutions

These are baccalaureate or post baccalaureate institutions characterized by a programmatic emphasis in one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area. An institution granting over 60 percent of its degrees in one program area, or granting over one-half of its degrees in one program area *and* granting degrees in fewer than 5 baccalaureate program areas, is considered to be a specialized institution. (The U.S. Service Schools are also considered specialized.)

E. 2-Year Institutions

These are institutions that confer at least 75 percent of their degrees and awards for work below the bachelor's level.

---

*Programs, or program areas, are major fields of study defined at the two-digit level (such as 1200) of the HEGIS Taxonomy of Programs, plus closely related specialties. Subsequent references to program areas refer to this definition.

F. Institutions Newly Admitted to HEGIS

These are institutions that have been recently admitted to the Higher Education General Information System universe (NOT necessarily newly organized). As soon as degree and award information becomes available to NCES, these institutions will be reclassified.

Appendix C: Tables

Table A-1. Number of institutions of higher education, by type and control: Fall 1979-1982

1/ FOR INSTITUTIONS REPORTING RACE/ETHNICITY

Appendix D: Survey Form, Instructions and Definitions

UNITED STATES DEPARTMENT OF EDUCATION
WASHINGTON, D.C. 20202

HIGHER EDUCATION GENERAL INFORMATION SURVEY (HEGIS XVIII)

FALL ENROLLMENT AND COMPLIANCE REPORT OF INSTITUTIONS OF HIGHER EDUCATION, 1982

PLEASE READ INSTRUCTIONS BEFORE COMPLETING THIS FORM.

FORM APPROVED
O.M.B. NO. 1850-0035
APPROVAL EXPIRES: 7/84

1. FICE CODE NUMBER

2. DUE DATE
November 15, 1982

NOTICE: This report is mandatory only for those institutions subject to the requirements of Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972. For the other institutions, it is voluntary and authorized by U.S.C. 1221e-1. See page 2 for further information.

Supply all the identifying information requested on this page. When the survey form has been completed, return it either directly to the U.S. Department of Education, National Center for Education Statistics, 400 Maryland Avenue, S.W. (Presidential Building, Room 205, Attention: HEGIS), Washington, D.C. 20202, or to your HEGIS coordinator, if there is a HEGIS coordinator in your State.

3. NAME AND MAILING ADDRESS OF INSTITUTION OR CAMPUS COVERED BY THIS REPORT *(include city, State, and ZIP code)*

4. NAME AND TITLE OF RESPONDENT

5. TELEPHONE NUMBER OF RESPONDENT *(area code, local number, and extension)*

6. **PLEASE NOTE** THAT EACH INSTITUTION, BRANCH, CAMPUS OR OTHER ENTITY SEPARATELY CERTIFIED BY THE DIVISION OF ELIGIBILITY AND AGENCY EVALUATION OF THE U.S. DEPARTMENT OF EDUCATION, WITH ITS OWN FICE CODE, AND LISTED SEPARATELY IN THE EDUCATION DIRECTORY - COLLEGES AND UNIVERSITIES, SHOULD BE REPORTED ON A SEPARATE SURVEY FORM AND NOT INCLUDED OR COMBINED WITH ANY OTHER SUCH CERTIFIED UNIT. BRANCHES, CAMPUSES, AND OTHER ORGANIZATIONAL ENTITIES NOT SEPARATELY CERTIFIED SHOULD BE INCLUDED WITH THE APPROPRIATE INSTITUTION OR BRANCH REPORT. IF SUCH ARE INCLUDED IN THIS REPORT, PLEASE LIST THEM BELOW.

ARE DATA FOR THIS UNIT INCLUDED IN THIS REPORT?	NAME OF BRANCH AND/OR OTHER CAMPUS	ADDRESS *(city, State, and ZIP code)*
☐ YES ☐ NO		
☐ YES ☐ NO		
☐ YES ☐ NO		

7. IF THE EDUCATIONAL ORGANIZATION OR ENTITY COVERED BY THIS SURVEY REPORT IS PART OF A MULTI-CAMPUS INSTITUTION, OR PART OF A SYSTEM OF INSTITUTIONS, PLEASE ENTER THE NAME OF THE INSTITUTION OR SYSTEM BELOW.
IF NOT APPLICABLE, CHECK HERE → ☐

DEFINITIONS

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently administered, under the control of a single administrative body.

MULTI-CAMPUS INSTITUTION. An organization resembling an institutional system, but clearly designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. (Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is understood to be the location of the central administrative office.)

BRANCH CAMPUS. A campus of an institution of higher education which is located in a community different from that of its parent institution, that is, beyond a reasonable commuting distance from the main campus of the parent institution. To be considered a branch campus, rather than an extension center, the educational activities at the location must be organized on a relatively permanent basis (i.e., have a relatively permanent administration) and include course offerings for one or more complete college-level programs of at least one full year.

VOLUNTARY VERSUS REQUIRED REPORTING

This survey constitutes an integral part of the comprehensive system of statistics on higher education collected by the National Center for Education Statistics *(NCES)* as part of the Higher Education General Information Survey *(HEGIS)*.

In recent years, for the purpose of enforcing compliance with Federal regulations implementing civil rights laws applicable to institutions of higher education, the Office for Civil Rights *(OCR)* has been collecting similar enrollment data on a mandatory basis.

In order to lighten the burden on reporting institutions by eliminating the considerable duplication of effort in reporting enrollment data to two separate agencies, the two surveys have been combined into this single questionnaire and integrated into the HEGIS program.

Completion of this questionnaire is mandatory for all institutions of higher education which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Health, Education and Welfare *(HEW)* regulation implementing Title VI *(45 CFR 80.13)*, or as defined in any HEW regulation implementing Title IX. *(See also the Instructions for completing this questionnaire.)*

Those institutions to which the regulations do not apply are not required to complete this questionnaire. However, it is hoped that institutions not subject to these provisions will voluntarily complete the entire survey--or at least the Summary page--in order that the data may represent the entire universe of higher education. As a minimum NCES requests that institutions complete columns 13 through 15 on the Summary page in order to enable NCES to continue to provide basic enrollment data serving the needs and interests of the total higher education community.

UNITED STATES DEPARTMENT OF EDUCATION
WASHINGTON, D.C. 20202

FORM APPROVED
O.M.B. NO. 1880-0038
APPROVAL EXPIRES: 1/84

INSTRUCTIONS FOR COMPLETING FALL ENROLLMENT AND COMPLIANCE REPORT OF INSTITUTIONS OF HIGHER EDUCATION, 1982

GENERAL INSTRUCTIONS

Proofread the completed report before returning it to the National Center for Education Statistics.

This report should include students taking work creditable toward an associate, bachelor's, or higher degree, or those students enrolled in a vocational or technical program that is normally terminal and results in some other formal recognition below the baccalaureate degree.

If exact counts are lacking for a particular category of students that should be reported, include an estimate for that group.

Do NOT fill out separate forms for extension centers. Only campuses with their own FICE code numbers should be reported on separate questionnaires. Extension students should be reported on the form for the main campus.

Do NOT include in this report:

(a) Students in noncredit adult education courses and noncredit extension courses.

(b) Students taking courses at home by mail, radio, or television where the course(s) are not creditable toward a bachelor's degree or some other formal recognition below the baccalaureate degree.

(c) Auditors.

(d) Students studying abroad if their enrollment at the institution is only an administrative record and the fee is only nominal.

(e) Students in any branch campus or extension center in a foreign country.

(f) High school students taking college courses.

(g) Students known to be enrolled concurrently at another college or university, if the latter will report their enrollment *(to avoid double-counting)*. Normally, the institution that will eventually grant the degree should report the student's enrollment.

NOTE: No matter what the calendar system, report on this questionnaire only those students enrolled during the FALL TERM.

If you need CLARIFICATION of any item on the questionnaire that pertains to fall enrollment, call the Survey Director, Susan Broyles, NCES (301) 436-6425.

MAJOR FIELDS OF STUDY AND CORRESPONDING MAJOR FIELD CODES.

The listing below identifies selected categories of major fields of study, and their corresponding codes. These were taken directly from A Classification of Instructional Programs and aggregated into fields as listed below. The field name and corresponding code number have been preprinted in the upper left-hand corner of each page. If your institution has no students enrolled in any of the designated fields, check the box as indicated. Students enrolled in the fields of Dentistry, Medicine, Veterinary Medicine, and Law are not to be reported as undergraduate or graduate students but only as first-professional students. Students in those programs requiring only 4 or 5 years beyond high school should be reported as undergraduates in the appropriate fields.

04.00 Architecture and Environmental Design
06.00 Business and Management
14.00 Engineering
18.04 Dentistry
18.10 Medicine
18.24 Veterinary Medicine
22.00 Law
26.00 Life Sciences
27.00 Mathematics
40.00 Physical Sciences
90.00 All other (fields not included above and undecided/undeclared)
99.99 Summary (total enrollment). In addition to separate reports for each of the major fields or sub-fields listed above, complete the Summary report which aggregates the enrollment data on the individual field reports.

Column 15 will be completed ONLY for the Summary report. Individual reports will NOT show data in column 15.

FILING INSTRUCTIONS – COMPLIANCE REQUIREMENTS.

Title VI of the Civil Rights Act of 1964 requires that recipients of Federal financial assistance offer their benefits and services without regard to race, color, or national origin. Title IX of the Education Amendments of 1972 requires that the benefits and services of federally assisted vocational programs and activities be offered, with certain exceptions, nondiscriminatorily on the basis of sex. This report is one indicator utilized by the Office for Civil Rights in carrying out its responsibilities to verify compliance with Title VI and Title IX. Also applicable are Section 799-A, Part H, Title VII and Section 845, Part C, Title VIII of the Public Health Service Act of 1972.

This report is to be filed by all institutions of higher education which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Health, Education, and Welfare regulation implementing Title VI *(45 CFR 80.13)*, or as defined in any Department of Health, Education, and Welfare regulation implementing Title IX. If your institution does not fall into any of these categories, please inform us of this fact.

Section 80.6(b) of the regulation implementing Title VI, set forth below, and similar provisions of the Title VI regulations of other Federal agencies, authorize collection of this information:

80.6 Compliance information
(b) Compliance reports

Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times and in such form and containing such information, as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. For example, recipients should have available for the Department racial and ethnic data showing the extent to which members of minority groups are beneficiaries of and participants in federally-assisted programs. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

Each institution of higher education, as well as each separately certified branch campus *(with its own FICE code number)*, that is subject to the HEW civil rights regulation cited above is required to complete a separate compliance report for certain selected major fields *(listed above)* as indicated in the upper left-hand corner of each page.

RACIAL/ETHNIC CATEGORIES

The following five racial/ethnic categories are utilized in the survey:

Black Non-Hispanic
American Indian or Alaskan Native
Asian or Pacific Islander
Hispanic
White Non-Hispanic

Racial/ethnic designations as used in this survey do not denote scientific definitions of anthropological origins. For the purpose of this report, a student may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging. However, no person may be counted in more than one racial/ethnic group.

In addition, non-resident aliens, i.e., those members of the aforementioned groups who have not been admitted to the United States for permanent residence, should be separately identified as a sixth category; the non-resident aliens are not separately requested by racial/ethnic groups, but only in totals.

The definitions for these categories are:

Non-Resident Alien. A person who is not a citizen or national of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely. Resident aliens, who are not citizens or nationals of the United States and who have been lawfully admitted for permanent residence *(and who hold alien registration receipt cards – Form I-551/155)*, are to be reported in the appropriate racial/ethnic categories along with United States citizens.

Non-resident aliens are to be reported separately, on the lines provided, rather than in any of the five racial/ethnic categories which follow.

Black, non-Hispanic: A person having origins in any of the black racial groups of Africa *(except those of Hispanic origin)*.

American Indian or Alaskan Native: A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander: A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa.

Hispanic: A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

White, non-Hispanic: A person having origins in any of the original peoples of Europe, North Africa, or the Middle East *(except those of Hispanic origin)*.

The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data. One acceptable method is a properly controlled system of post-enrollment self-identification by students. If a self-identification method is utilized, a verification procedure to ascertain the completeness and accuracy of student submissions should also be employed where feasible. In order to provide reasonably accurate data, the institution may require students to complete a questionnaire and/or identify themselves by name or otherwise when providing information. The fact that the information is being gathered in compliance with Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972 may be disseminated in the manner and to the extent that the institution deems appropriate.

DEFINITIONS

UNDERGRADUATES. Students enrolled in a 4- or 5-year bachelor's degree program, in an associate degree program, or in a vocational or technical program that is normally terminal and results in formal recognition below the baccalaureate degree.

CLASS LEVEL. Whether first-year, second-year, etc., should be determined in a logical, consistent, and identifiable way. Usually, a student's class level is based on the proportion of total program requirements completed, compared with the institutionally defined length of program in years, or the number of years required of a fully-engaged student to complete the program.

FIRST-TIME FRESHMEN. Entering freshmen who have not previously attended **ANY** college. Include students enrolled in the fall term who attended college for the first time in the summer of 1982. Also include students who entered with advanced standing *(college credits earned before graduation from high school)* at the freshman level.

OTHER FIRST-YEAR. First-year students who entered the institution before the summer of 1982.

UNCLASSIFIED STUDENTS. Not candidates for a degree or other formal award, although taking courses for credit in regular classes with other students.

UNDERGRADUATE LEVEL. Includes but is not limited to undergraduates who cannot be classified by class standing; for example, new transfer students. Also included are students who already have bachelor's degrees or awards below the baccalaureate degree but are taking courses at the same level or lower. Included also are "special students" and teachers taking additional undergraduate courses for certification.

POSTBACCALAUREATE LEVEL. Includes but is not limited to "special" and other students taking first-professional or graduate courses but who are not working toward a degree.

FIRST PROFESSIONAL STUDENTS. Students enrolled in a professional school or program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. Report only students in those first-professional degree programs in the field of medicine, law, theology specified in Part A of ED *(NCES)* Form 2300-2.1A, Degrees and Other Formal Awards Conferred. Students in such programs requiring only 4 or 5 years beyond high school should be reported as undergraduates.

GRADUATE STUDENTS. Students who hold the bachelor's or first-professional degree, or equivalent, and are working toward an advanced degree.

FIRST-TIME GRADUATE STUDENTS. A student who is enrolled at the graduate level for the first time and who has not previously attended any other college as a graduate student. Include graduate students enrolled in the fall term who attended graduate school for the first time in the summer of 1982.

ALL OTHER GRADUATE STUDENTS. All graduate students who are not first-time.

FULL-TIME STUDENTS. Those whose academic load *(course work or other required activity)* is at least 75% of your institution's normal full-time load.

FULL-TIME EQUIVALENT ENROLLMENT (FTE) OF PART-TIME STUDENTS. *Convert part-time students (lines 13-28)* into full-time equivalency by one of the following:

(1) Use a method already employed in your institution to compute FTE's for some other purpose.

(2) Sum the credit hours for part-time students and divide by the normal full-time credit-hour load. **NORMAL FULL-TIME CREDIT-HOUR LOAD** is usually determined by dividing the total number of credits required for completing the program by the institutionally defined length of program in terms, or by the number of terms required of a fully-engaged student to obtain such credits. Do not confuse this with the minimum number of credit-hours required for a student to be classified full-time *(75% of a normal full-time load)*. **NOTE:** Divide by the normal full-time load, not by the minimum full-time load. For most institutions, this will be 15 credit-hours *(not 12)*.

(3) Assign a fractional value of full-time to each part-time student, as appropriate to your institution, such as 1/4, 1/3, or 1/2. Remember that a student taking 3/4 *(75%)* or more of a normal full-time load should be classified as a full-time student.

NOTE: In all cases full-time equivalent enrollment (FTE) of part-time students should be reported as whole numbers (lines 10-28, column 16).
